

## What are esthetic treatments?

At Dermatology Consultants we believe in a comprehensive approach to skin care. This means providing a full scope of general, cosmetic and esthetic treatments and services, from prescribing the latest laser treatments to recommending a regular schedule of revitalizing facials for your skin.

Our estheticians work closely with our dermatologists to provide a complete range of services. The result is a unique skin care regimen that keeps your skin clear, glowing and fresh at any age. Esthetic skin consultations, facials, peels and other services such as facial waxing are provided at our Eagan, Saint Paul, Vadnais Heights and Woodbury offices.

“I have continued to receive facials and product suggestions as the years move forward as my skin needs change. I am often complimented on my glowing, healthy and youthful skin.”

— CHRISTINE D.

“Thanks to the estheticians at Dermatology Consultants, my skin looks the best it has in years! I love how confident I feel after my facial and dermal infusion treatments.”

— ALLISON C.

## Appointments

587 Bielenberg Dr., Suite 200  
Woodbury, MN 55125  
651.578.2700

Cosmetic services performed by Dermatology Consultants are considered elective procedures by the physician, the insurance carrier and the patient. The patient is financially responsible for the full cost of cosmetic procedures. Insurance companies are not billed for cosmetic procedures. Patients are given a separate price quote for cosmetic procedures which is to be considered the invoice for services rendered. If non-cosmetic services or procedures are performed on the same day, a separate bill will be generated and sent to the insurance company. Any repeat procedures or “touch-ups” will be considered new and separate procedures and will be billed accordingly. Cosmetic results cannot be guaranteed, and refunds are not given.

## Esthetician Services

Esthetician services at Dermatology Consultants include a range of services, from complimentary skin care consultations to relaxing facials. Our overall goal is to improve the look and feel of your skin by recommending and performing treatments tailored to your personal needs.

- **General Skin Care Consultations** include a detailed analysis of your skin to determine your individual needs and explanations of treatments recommended to meet your specific goals. Products are also suggested to supplement your daily skin care regimen.
- **Prevent and Protect Skin Care Consultations** are recommended for those with a history of skin cancer or strong sun exposure who wish to protect the skin from additional sun damage and reverse some of the signs of photoaging.
- **Facials** are customized according to your skin's particular needs including acne, anti-aging and issues of mature skin.
- **Facial Waxing** services are available.
- **Laser Hair Removal** services are available.

## Clinical Skin Procedures

Our estheticians are experts in using advanced clinical skin procedures to benefit skin texture and tone.

- **DiamondGlow**  
DiamondGlow is an advanced skin-resurfacing treatment that combines exfoliation, extraction, and infusion of condition-specific serums to improve skin health, function and appearance.
- **Microneedling**  
Microneedling uses tiny sterile needles to safely and precisely create controlled micro-injuries to the skin, triggering new collagen production. It is used to improve the skin's tone and texture, reduce pigmentation and improve scars and stretch marks.
- **Dermaplaning**  
Dermaplaning exfoliates and resurfaces dull, dry skin with the added benefit of removing excess facial hair. Dermaplaning is a gentle, effective treatment that leaves your skin extremely soft and looking great.
- **Peel Treatments**  
Peel treatments help address a broad range of complexion concerns including fine lines, uneven texture, photo-damage, sun spots, acne and facial redness. These mild- to medium-depth peels improve skin color, texture and glow.

“My esthetician truly listened to me about my skin problems. Together we arrived at a plan for treatments and products that would restore my skin to the natural and healthy beauty I was looking for.”

— JENNIFER D.
